

Quality & Style

Shutter solutions

THERMOWOOD shutters

Fashion for windows

Shutters have become *the* fashionable window covering the world over and represent the fastest-growing sector of this market in Europe and the USA. Thermowood Shutters can withstand extremes of hot and cold, of dry and damp, and are therefore eminently suited to South African conditions.

Thermowood is a durable substitute for scarce hardwoods and does not require the on-going maintenance associated with wood products. It is manufactured entirely from a specially engineered, extruded PVC and is completely impervious to moisture, is fire resistant and easy to clean. Thermowood offers excellent control of light, noise and temperature. The shutters can be fitted inside windows or sliding doors, and can also be used to create an extra room on a stoep or patio.

Thermowood, a world-class product, offers a practical and elegant finishing touch to your decor.

Shutter GUARD

Security with style

This innovative, patented system provides an almost impenetrable barrier against burglars, without your house looking – or feeling – like a prison!

ShutterGuard is manufactured entirely from aluminium and stainless steel, with a durable powder-coated finish, and is therefore impervious to rust, wind and weather. It can be fitted inside windows and sliding doors, and the slats are fully adjustable to provide a clear view or to ensure privacy.

ShutterGuard is the only system that does the work of both shutters and burglar bars. The panels are lockable, and the patented mechanism makes it extremely difficult for an intruder to break the slats without the use of power tools, even when the slats are open. Each unit is made to order and installed by expert staff, to fit exactly and function perfectly.

Forget about putting yourself behind bars – get protection with elegant, but tough, ShutterGuard!

Now with a patented key lock mechanism!
The shutters are locked securely by turning a knob, but can only be opened from the inside with the key.

TESTED ShutterGuard withstood an attack with a 2-kilogram hammer!

Quality that lasts

Each set of shutters is made to order, is installed by trained staff and is guaranteed to fit exactly and function perfectly for years.
