ROLLER BLINDS SCREEN PROTECT

Take care and don't lose sight of what's important with our 100% view-through ROLLER BLINDS SCREEN PROTECT. Because of its antimicrobial fibres, this sleek and stylish screen safeguards against contamination, making it arguably the safest product of its kind on the market. Now you can maintain the corporate culture at your office or the camaraderie in the classroom. These screens double-up as room dividers and can manage contact-intensive spaces like waiting rooms and shops too.

They're easy-to-clean, easy to erect and as an added hygiene convenience, they're easy to motorise. With no encouragement to touch any part of the blind, not even the pull cord, Taylor's ROLLER BLINDS SCREEN PROTECT is perfectly suited to these challenging times.

HEALTH AND SAFETY SCREENS

Don't let Covid-19 legislation force you to completely redesign your place of work or reduce your capacity.

Protect your employees and customers and make your business compliant with Health and Safety regulations without losing floor space by using our larger size fixed and retractable screening solutions.

FREE-STANDING SCREEN

Health and Safety for all areas.

Health and Safety for all commercial and public areas has changed drastically since the onset of Covid-19. In all areas where people congregate, including offices, restaurants, bars, hotels, food outlets, factories, hospitals and schools, we are required to have protective measures in place to reduce the risk of infection.

The use of screens as a means of separation is an effortless way to achieve social distancing. Retractable screens offer further versatility and can be rolled up when not required. Our retractable and lightweight Lockscreen technology can also be used to create a completely sealed quarantine area.

HEALTH AND SAFETY SCREENS
